

# MUSTANG ▽ SURVIVAL

# LIVE BEYOND LAND™

For over 50 years Mustang Survival has been delivering confidence to those who work, play, or protect on or in the water. Our headquarters, the Mustang Waterlife Studio in British Columbia, Canada, includes; a science lab to test human physiology and material properties, a prototyping shop that our industrial design and engineering team can craft product concepts, a 11 foot deep testing pool to evaluate new ideas, and a full manufacturing center to carefully craft our marine gear. The Mustang Waterlife Studio is located on the banks of the mighty Fraser River, which feeds the Pacific Ocean, allowing us to test products in the real-world the same day we build them. By controlling every facet of the product experience from concept to manufacturing, we can truly challenge the status quo of how marine gear is designed and built.

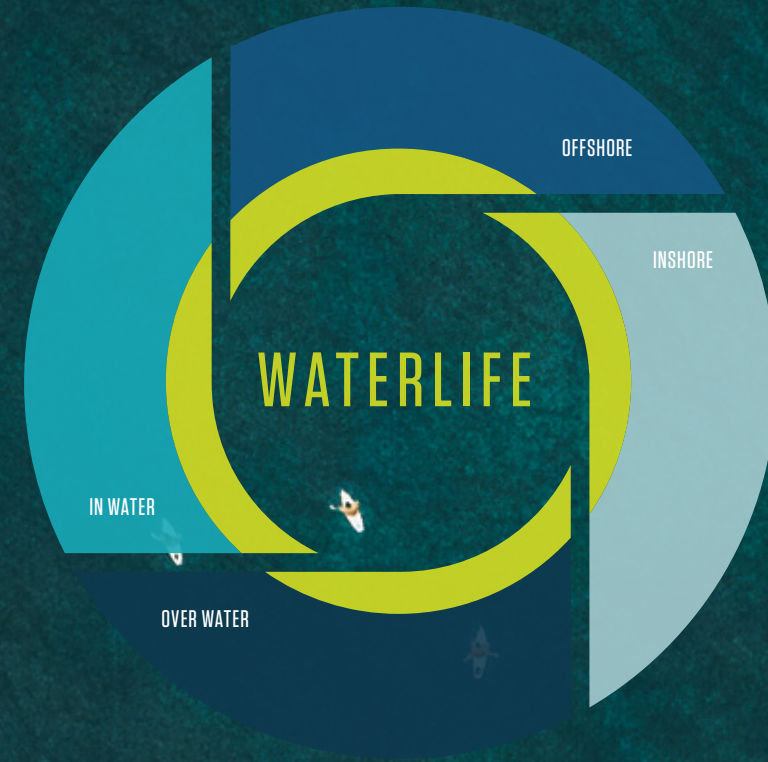

We work to protect and enrich the lives of those that share our belief; that a life on the water is better than a life on land.

# PRODUCT ARCHITECTURE

For 2019 and beyond, we've organized our products by environment to help our customers easily identify the products they need.

The waterlife collection is at the center of our product architecture. These are products that have a wide range of use across environments, activities, and outputs. Waterlife products build a foundation for assortments, allowing customers to assort Waterlife products with specialized choices to create the right assortment for the customer.

**WATERLIFE**  
 Products that can be used across environments, activities, and outputs.

INSHORE	IN WATER	OFFSHORE	OVER WATER
Products designed for use near shore, on lakes, or rivers. You can still expect inclement weather and rough water.	Products designed for when you expect to be in and out of the water during your activity.	Products designed for use far from the shore. You can expect rough seas, harsh winds, and inclement weather where rescue would take time.	Professional products specifically designed for use on air transport when working or traveling over water.

# 2019 RECREATION COLLECTION

After 30+ years of keeping the elite professional user dry in Mustang Survival drysuits, we are leveraging that knowledge to launch our first truly recreational focused Drysuits. Designed for in-water use across a variety of activities, the Hudson™ drysuit launches Mustang Survival forward with a product we've already been mastering for decades. [p. 22]

The inshore environment demands technical apparel that works hard. Designed in tandem with inshore sailing racers, the new Callan™ franchise is worn primarily in warmer weather conditions and takes advantage of a new MarineSpec™ waterproof, breathable fabric that excels when working hard on a boat. The kit for 2019 includes a versatile Inshore Jacket & Shorts, with a pair of Salopettes that truly excel at inshore sailing. [p. 18]

Complementing the new collection is a Waterlife thermal jacket, the Torrens™, that can be worn across environments. The Torrens™ takes advantage of premium Polartec® Alpha fabric and should be a mainstay in everyone's marine assortment. [p. 24]

New updates to the kids PFD line form the backbone to our PFD updates for the season. Updated styling, fabrics, and colours modernize the line which keeps evolving to meet the needs of the young mariners of the future. [p. 52]

Evolutions for the rest of the line highlight our 2019 assortments.

# WATERLIFE

Our Waterlife collection includes products that can be used across all environments, activities, and output levels. This gear can be used as a foundation to build robust assortments by combining them with specialized product selections.

MODEL# USA: MD6284	CAN: MD6254
SIZE UNIVERSAL ADULT	REARM "B" MA5283
APPROVAL   USCG TYPE V with Type II Performance TC Approved Inflatable PFD (Type II Performance)	

Our offshore ocean racing PFD, the EP38 is ready to race and meets ISAF compliance. Our lowest profile, highest level of buoyancy inflatable. Our only PFD with an integrated spray hood.

#### SPECS

- ISAF Race Ready (combines Coast Guard approvals and ISAF compliance for ultimate performance)
- Low profile, lightweight chassis cut for active use
- 360 degree motion for high output grinding and sail changes
- Hydrostatic Inflator Technology (HIT™) will only inflate when submerged in 4" or more water, and not in rain, spray, or high humidity
- Discreet manual inflation handle prevents snags
- Back mounted, storable spray hood
- Marine-grade retro-reflective materials and whistle
- Integrated sailing harness with soft tie-in
- Lifting loop + internal storage for AIS, PLBs, strobes and other electronics

123 RED/BLACK

High buoyancy PFD that maximizes comfort and styling. Automatic inflator technology best suited for fair weather offshore adventures. Also, a manual inflator option for when you want to control the inflation when getting in and out of water.

### SPECS

- Automatic inflation model inflates upon water immersion / Manual inflation model inflates by pulling on activation cord
- AIS compatible to aid searchers in a rescue situation
- Water resistant zippered side pocket
- More comfortable fit around neck and back
- MOLLE inspired attachment system for custom configuration of gear (pocket sold separately)
- Dual side adjusters provide an easy size adjustment
- 38 LBS buoyancy when inflated
- MA7637 1.5" Buckle Belt Extender sold separately

### M.I.T. 100 INFLATABLE PFD (AUTOMATIC) / M.I.T. 100 INFLATABLE PFD (MANUAL)

MODEL# AUTOMATIC / USA: MD2016 02, MD2016 CM CAN: MD2017 02, MD2017 CM	
MANUAL / USA: MD2014 02, MD2014 CM CAN: MD2015 02, MD2015 02 CM	
SIZE UNIVERSAL ADULT	REARM "D" MA2014
APPROVAL   USCG Type III / Type V Commercial TC Approved Inflatable PFD (Type III Performance)	

A super easy-wearing PFD and a popular choice for "first inflatable" users. Simple 1-fold repack design and ultra lightweight design thanks to M.I.T. film inside. Ideal for inshore or calmer water.

**SPECS**

- Automatic inflation model inflates upon water immersion / Manual inflation model inflates by pulling on activation cord
- Exclusive Membrane Inflatable Technology™ (M.I.T.)
- Inflator inspection window + easy access flap
- Provides 28lbs buoyancy when inflated
- MA7632 2" Buckle Belt Extender sold separately

MODEL# USA: MD5183 / MD5183 BC CAN: MD5153 / MD5153 BC	
SIZE UNIVERSAL ADULT	REARM "A" MA5183
APPROVAL   USCG Type III (Type V Commercial) TC Approved Inflatable PFD (Type III Performance)	

The Elite™ 28 HIT™ inflator is ideal for fast moving boats and traveling at speed. Comfortable, slim, aerodynamic chassis. A favourite among bass fishermen who have high output activity and like mobility.

**SPECS**

- Aerodynamic 3D chassis reduces drag at high speeds
- Shaped for optimum mobility and comfort
- Wicking mesh liner
- Discreet inflation handle reduces interference
- 28 LBS buoyancy when inflated

### ACCEL 100 FISHING VEST

MODEL# USA: MV4620 CAN: MV4621	
SIZE S-XXXL	
APPROVAL   USCG Type III TC Approved PFD	

This vest is the best foam PFD for users whose only speed level is turbo. It offers the highest available speed rating on the market, and was designed specifically for fishing.

**SPECS**

- Dynamic strength-tested construction for speeds up to 100 mph (USA only)
- Fleece-lined collar and hand warmer pockets for chilly mornings
- Split foam reduces ride up while sitting

### KHIMERA™ DUAL FLOTATION PFD

MODEL# MD7183	
SIZE UNIVERSAL ADULT	REARM "G" MA7116
APPROVAL   HARMONIZED* LEVEL 70 BUOYANCY (equivalent to TYPE III Performance)	

Our revolutionary dual flotation PFD. This vest inflates! It gives just enough foam to help you float and swim easily, plus it can easily be inflated to boost buoyancy with a quick pull of the manual handle when you really need it.

**SPECS**

- Dual flotation system blends the security of foam flotation with the slim profile of inflatable technology
- 7.5 lb foam buoyancy keeps you afloat without creating bulk
- Pulling the manual inflator boosts you to 20.5 lb of buoyancy –more than traditional foam PFDs
- Lightweight and low profile design offers greater comfort and range of motion, and eases re-entry into your boat from the water
- Adjustable shoulder straps for an improved fit

\*HARMONIZED: New Government approval system that results in the harmonization of safety approvals between the USA and CA to create a standard followed by both countries. USCG + TC Approved.

### INFLATABLE BELT PACK PFD

MODEL# USA: MD3075 CAN: MD3071	
SIZE UNIVERSAL ADULT	REARM "E" MA7114
APPROVAL   MD3075 / USCG Type III MD3071 / TC Approved Inflatable PFD (Type III Performance)	

Super compact. The belt pack is ideal for users wanting a discreet PFD that stays out of the way. Manual inflation gives inflation control for Kayaking or SUP users.

**SPECS**

- Stays out of the way until activated
- Lightweight ergonomic fit
- Manually inflates by pulling activation cord
- 35LBS buoyancy when inflated
- Soft neoprene backing reduces chafing when worn against skin
- MA7637 1.5" Buckle Belt Extender sold separately

188 BLACK/CARBON

INTENDED USE	GREAT FOR
SUP	FLATWATER PADDLING/FLY FISHING

### INFLATABLE FISHERMAN'S VEST

MODEL# MIV-10	
SIZE UNIVERSAL ADULT	REARM MI5700

Moderate manual inflation for when you need to control buoyancy, like when you're waist deep fly fishing. Cool retro vibe with multiple large pockets, and a hook and fly patch.

**SPECS**

- Six roomy storage pockets
- Manually inflates by pulling activation cord
- 16 LBS buoyancy when inflated
- Sheepskin hook and fly patch

07 OLIVE

INTENDED USE	GREAT FOR
FLY FISHING	FISHING

### DELUXE PADDLING VEST

MODEL# USA: N/A    CAN: MV5801
SIZE S-XXL
APPROVAL   TC Approved PFD

Great for users who prefer the tried and true styling of standard foam paddling vests. Designed to contour and cinch to the body for great fit, and Dri-Lex mesh keeps you cool.

**SPECS**

- Specialized low profile construction contours to the body
- Dri-Lex mesh lining transports perspiration away from the skin and provides added ventilation for cooling comfort
- Two zippered pockets

181 RED/CARBON/BLACK

INTENDED USE	GREAT FOR
FLATWATER PADDLING	SUP / KAYAK FISHING/ WHITEWATER PADDLING

### DELUXE SPORTSMAN'S VEST

MODEL# USA: N/A    CAN: MV5901
SIZE S-XXL
APPROVAL   TC Approved PFD

Tried and true foam fishing vest. Keep your gear on-hand with large pockets and multiple attachment points. Dri-Lex mesh keeps you cool.

**SPECS**

- Specialized low profile construction contours to the body
- Dri-Lex mesh lining transports perspiration away from the skin and provides added ventilation for cooling comfort
- Large beveled cargo pockets with secure closures

235 CARBON/TAUPE/BLACK

INTENDED USE	GREAT FOR
FISHING	FLATWATER PADDLING / SUP / KAYAK FISHING

### MEN'S HORSEPOWER NEOPRENE PFD

MODEL# USA: N/A    CAN: MV1283
SIZE XS-XXXL
APPROVAL   TC Approved PFD

The only mens neoprene PFD in our line-up, this vest offers high-grade neoprene in a very flexible fit.

**SPECS**

- High grade neoprene for a soft, comfortable fit
- Large armholes for enhanced mobility
- Split tail reduces ride-up

13 BLACK

## HYPOTHERMIA PROTECTION

In just 20 minutes, cold water can deprive you of all mental and physical capacities, leading to hypothermia, unconsciousness and even death. Our team of engineers have done extensive research to understand cold-water survival. How long a person can survive in cold water primarily depends on the water's temperature, exposure time, and the thermal insulation of the victim's protective clothing.

## SURVIVAL TIMES

This graph indicates random samples of Clo values and the corresponding estimation of survival time in calm water (assuming a thin person with a 5.5°F [3°C] drop in core temperature).

## WHAT IS A "CLO" & WHAT DOES IT MEAN?

"Clo" is a measurement of the thermal insulation of a suit or device. One Clo represents the thermal comfort of an average person in business clothing in a room temperature indoor environment. Fractions of this thermal insulation are what are perceived when worn in the water. Each of the values are below 1.0 because water transfers heat out of the body 25 times faster than air. Wearing a Mustang Survival suit will increase cold water survival time exponentially.

PROTECTION	CLO VALUE
NUDE	0.060
CLOTHED	0.100
CATALYST FLOTATION COAT AND PANTS	0.170
SENTINEL™ SERIES WATER RESCUE DRY SUIT	0.660
ICE COMMANDER SUIT	0.960

## OCEAN COMMANDER TC/SOLAS

MODEL# USA: N/A CAN: OC8003 HR
SIZE Universal Adult
APPROVAL   TC SOLAS, MED SOLAS

### SPECS

- SOLAS immersion suit
- Fluorescent yellow-green for improved visibility
- Hood offers a water-tight fit; face seal gives top protection from water and wind exposure
- Immersed \*Clo 0.960

239 FLUORESCENT YELLOW GREEN

## NEOPRENE IMMERSION SUIT WITH HARNESS & BUDDY LINE

MODEL# USA: Child MIS210 HR Sm Adult MIS220 HR Adult MIS230 HR OS Adult MIS240 HR	MODEL# CAN: Child N/A Sm Adult MIS220 TC Adult MIS230 TC OS Adult MIS240 TC
SIZE Child / Adult Small / Adult Universal / Adult Oversize	
APPROVAL Child USA: USCG SOLAS, MED SOLAS, USCG Immersion Suit Adult USA: USCG SOLAS, MED SOLAS, USCG Immersion Suit Adult CAN: TC SOLAS, MED SOLAS, CAN/CGSB Immersion Suit	

### SPECS

- Easy to don in stormy conditions
- Five-fingered insulated gloves for warmth and dexterity
- Water-tight face seal

04 RED

## RING BUOY - 30" WITH REFLECTIVE TAPE

MODEL# MRD030
SIZE 30"
APPROVAL   USCG Type IV TC Approved Lifebuoy, SOLAS

### SPECS

- SOLAS grade reflective tape
- Polypropylene rope with UV stabilizer

02 ORANGE

## 90 FT. RING BUOY LINE WITH BAG

MODEL# MRD190 (USA only)
SIZE 90' (27.4m)

### SPECS

- Length: 90' (27.4 m)
- Material: 3/8" (9.5 mm) Polypropylene Floating Rope
- Break Strength: 1900 LBS (862 kg)

## 75 FT. THROW BAG

MODEL# MRD075
SIZE 75'

### SPECS

- 75' of 9mm multi-filament floating polypropylene rope
- Mesh top for quick drying
- Break Strength: 1900 LBS (862 kg)
- Retro-reflective tape with light stick holder and quick release buckles

## ICE COMMANDER SUIT

MODEL# IC9001 03
SIZE Universal Adult

### SPECS

- Fully waterproof outer shell with removable flotation liner
- Water tight hood, gloves and non-slip rubber soled boots
- 45% lighter than other rescue suits

06 GOLD

## ICE COMMANDER SUIT PRO

MODEL# IC9002 02
SIZE Universal Adult

### SPECS

- Fully waterproof outer shell with removable flotation liner
- Water-tight hood, gloves and non-slip rubber soled boots
- Features extended torso, covered diagonal entry zipper and multi-point adjustments

06 GOLD

RE-ARM KIT NAME & MODEL #	DESCRIPTION	INFLATABLE PFD PRODUCTS SUPPORTED
RE-ARM KIT A / MA5183	HYDROSTATIC 24G - METAL HANDLE	MD5183, MD5153
RE-ARM KIT B / MA5283	HYDROSTATIC 33G - METAL HANDLE	MD5283, MD5253, MD6284, MD6254
RE-ARM KIT C / MA7214	HYDROSTATIC 33G - PLASTIC HANDLE	MD3183 (02/GS/LE/T2/T3), MD3184 (02), MD3188 (GS), MD3153 (02/LE/T3), MD3154 (02), MD3155 HT, MD3157
RE-ARM KIT D / MA2014	AUTO/MANUAL 24G - BAYONET	MD2014 (02/CM), MD2015 (02/CM), MD2016 (02/CM/T1), MD2017 (02/CM/T1)

MA7159	RE-ARM PART - GREEN PINS - 100 PACK	
MA9210	RE-ARM PART - BOBBIN USA - 12 PACK	
MA9211	RE-ARM PART - BOBBIN CDN - 12 PACK	

MODEL NUMBER	PRODUCT NAME	COMPATIBILITY
MA3032	LEG STRAP ASSEMBLY FOR INFLATABLE PFDS	FITS MUSTANG SURVIVAL PFDS WITH 1" OR 1.5" WEBBING
MA7099	ACR HEMILIGHT 3 - WATER ACTIVATED PERSONAL LOCATOR LIGHT	ALL PRODUCTS WITH 1" ATTACHMENT STRAPS, TABS OR WEBBING
MA0060	MOLLE COMPATIBLE FISHING POCKET	FITS ALL INFLATABLE PFDS WITH MOLLE ATTACHMENT SYSTEM. CAN ALSO SNAP ONTO WAIST BELT OF ALL PFDS.
MA6000	UTILITY POUCH	ATTACHES TO ALL INFLATABLE PFD WAIST BELTS. AVAILABLE IN ORANGE (02) AND BLACK (13).
MA7632	BELT EXTENDER FOR 2" BUCKLE	INFLATABLE PFDS WITH 2" WEBBING
MA7637	BELT EXTENDER FOR 1.5" BUCKLE	INFLATABLE PFDS WITH 1.5" WEBBING

Use of other re-arm kits may result in improper operation or failure to operate and will void the product's warranty

# MUSTANG SURVIVAL TECHNOLOGIES /

New for 2019 is a third fabric in the MarineSpec™ family. We've taken this opportunity to put a naming system in place to avoid confusion on different layers and membrane construction. Our three MarineSpec™ fabrics are the following:

## MARINESPEC™ BP = BOMB PROOF

The most durably waterproof and windproof protection in the MarineSpec™ family of materials. Highly durable face fabrics with abrasion, salt water, and UV resistance form the outer layer; Internally, a fully waterproof, windproof, and breathable membrane with micro-porous coating is used to provide bomber protection in the most demanding marine environments.

## MARINESPEC™ SP = STORM PROOF

Waterproof and windproof protection offering exceptional breathability. Durable face fabrics with abrasion, salt water, and UV resistance form the outer layer. Internally, a non-porous membrane delivers waterproof and windproofness combined with high breathability making MarineSpec™ SP great stormproof protection for a variety of marine activities.

## MARINESPEC™ MP = MARINE PERFORMANCE

Durable waterproof and windproof protection with stretch and offers maximum breathability. A very soft, high performing fabric forms the inner and outer layers. Internally, a fully waterproof, windproof, and exceptionally breathable non-porous membrane offers marine protection for higher output activities on the water.

### 3D Chassis

Exclusive to the Elite™ Inflatable PFD. Creates a slim profile to enhance mobility, fit securely and reduce neck fatigue. Wind-tunnel tested to improve the body's aerodynamics, reduce drag at speed and limit wind interference.

### Closed Comfort System™ (CCS™)

Adjustable neck seal that can be worn loose when out of the water and tightened for immersion. Designed to optimize comfort in constant wear situations.

### Comfort Collar™

Made of exclusive Mustang Survival materials to improve comfort around the neck, reduce chafing and encourage all-day wear.

### Comfort Cuff™

Made of exclusive Mustang Survival materials to improve comfort around the wrists, reduce chafing and encourage all-day wear.

### Hydrostatic Inflator Technology (HIT™)

Water-pressure activated inflation. The inflator will automatically inflate under water pressure and not inadvertently in rain, spray or humidity. Inflates only when submerged in 4 or more inches of water.

### MarineSpec™

Engineered for the marine environment, MarineSpec™ fabrics have been through extensive field and laboratory testing.

### MarineSpec™ BP (4 layer)

The most durably waterproof and windproof protection in the MarineSpec™ family of materials. Highly durable face fabrics with abrasion, salt water, and UV resistance form the outer layer. Internally, a fully waterproof and windproof non-porous membrane with micro-porous coating is used to combine for the most bomber protection in the most demanding marine environments. Featured in Meris Jacket and Salopettes, and Arc outerwear.

### MarineSpec™ SP (3 layer)

MarineSpec SP is durable waterproof and windproof protection offering exceptional breathability. Durable face fabrics with abrasion, salt water, and UV resistance form the outer layer. Internally, a non-porous membrane delivers waterproof and windproofness combined with high breathability making MarineSpec SP great Stormproof protection for a variety of marine activities. Featured in the Meris Spray top, and Taku outerwear.

### MarineSpec™ MP (3 layer with stretch)

MarineSpec MP is durable waterproof and windproof protection with stretch and offers maximum breathability. A very soft, high performing fabric forms the inner and outer layers. Internally, a fully waterproof, windproof, and exceptionally breathable non-porous membrane offers marine protection for higher output activities on the water. Featured in Callan Jacket, Salopettes and Shorts.

### Membrane Inflatable Technology™

An ultra-lightweight inflation cell fabric that reduces product weight to create a lighter and more flexible fit.

### Merino Blend

Our users play in marine environments, and our merino blend is the best baselayer fabric for these conditions. It offers a blend of soft merino wool, and synthetic polyester, fused together to capture the best benefits of both materials. Our Merino blend wicks away sweat from the body to keep you dry, evaporates it slowly so that you stay warm even when soaked, and is super low odor even when worn for days on end. Used in our Regulate 175 and 230 base layers.

### Military Grade Gore-tex BD 6.5

An extremely durable Gore-tex waterproof breathable fabric, typically reserved for elite military and public safety operators. Offers an exceptional balance of extreme durability, breathability and waterproofness. Featured in our EP 6.5 Sailing collection.

### Mobility Based Sizing™

A sizing and fitting platform exclusive to the Sentinel™ Series Dry Suits. Based on more than two years of extensive anthropometric research, range of motion testing and user evaluations, Mobility Based Sizing™ offers users a semi-custom suit that reduces bulk and increases range of motion without the expensive custom price tags or long lead times. Applies to all Mustang Survival dry suits beginning with MSD6--.

### M-Tech™ Comfort System™

A 3-layer, waterproof, breathable, wearable flotation system that keeps you dry, floats you when you need it and is so comfortable you'll want to wear it even when you're not on the water. The first layer is a waterproof, breathable outer shell, the second layer is segmented foam that flexes and moves with you and allows moisture to transfer away from the body and the third layer is a wicking liner that aids breathability. Included in the Catalyst Flotation Coats, Jackets and pants.

### Rapid Repair Technology™

Enables users to self-replace neck and wrist seals in an hour or less, and repair minor leaks in the dry suit shell.

### Securezip™

A self-healing zipper originally designed for military aviators. Creates a lighter weight, lower profile and more secure fit. Breaks out effortlessly upon inflation and heals itself upon repacking.

### Tug-Tite™

Adjusters designed to be easy to use with cold or gloved hands to improve fit and reduce water flushing.

# HARMONIZATION

## 2018 FLOTATION STANDARDS UPDATE

Canada and the United States are working together to harmonize their flotation standards in order to improve the products and streamline the regulations. These new regulations are now starting to come into effect. This means that new devices that meet the updated standards will be approved for use in both Canada and the United States.

This harmonization work has led to a new performance classification system that will replace the old Type system. As a result, a new labelling system has been created that includes clear information and icons indicating performance of the device in the water. In addition to new labels, devices will include an information placard that will help users select a device that is both comfortable to wear and has the right performance (e.g. buoyancy, turning) for the planned activities.

For instance, our Khimera dual flotation vest is approved to the new harmonized standard. This means the Khimera has the new labels and can be sold and used in both countries. The performance level of the Khimera is indicated as a Level 70 and this should be considered equivalent to the old Type III foam classification. The Khimera complies with both Transport Canada and US Coast Guard requirements when worn and used for on water activities.

Currently approved devices will continue to be acceptable on board as long as they are in good condition. Devices with old labels continue to be approved in one country or the other, not both.

Mustang Survival will continue to provide information updates and go forward plans related to these new regulations.

For more information, please go to <http://wearitlifejacket.org>.

# WARRANTY & REPAIR /

Mustang Survival proudly guarantees the quality and performance of all our products. All Mustang Survival products come with a warranty that reflects our confidence in the high quality of our design, engineering and manufacturing.

## Warranty Periods:

Lifetime: Outerwear, Base layers, Gear haulers/bags, Gloves

Two years: Kids foam flotation, Inflatable flotation, Dry suits

One year: Adult foam flotation, all other products

What our warranty covers: Products with defects in materials or workmanship will be replaced or repaired at the discretion of Mustang Survival for the defined warranty period of the product.

The warranty excludes products damaged due to normal wear and tear, unauthorized modifications or alterations, improper use, improper maintenance, accident, misuse, negligence, damage, or if the product is used for a purpose for which it was not designed, or used not in accordance with the product instruction.

Unauthorized product modification automatically voids the Mustang Survival warranty. Damage due to wear and tear may be repaired at a reasonable charge.

Mustang Survival will use reasonable discretion to determine the validity of warranty claims. Each situation is different and is up to the discretion of Mustang Survival to determine whether a product has a manufacturing defect or if it is suffering wear and tear.

In the case that a product does have a manufacturing defect deemed by Mustang Survival and is repairable, Mustang Survival may choose to not replace but to repair the product free of charge. The decision on whether to repair or replace a product is solely up to the discretion of Mustang Survival.

The warranty applies to the original purchaser only and proof of purchase is required. Mustang Survival products purchased from unauthorized retailers, online auction sites, or as second hand items are not covered under warranty.

The only obligation or liability of Mustang Survival under this limited warranty is to repair or replace the product and Mustang Survival shall not, under any circumstances be liable for loss of use or any consequential damages sustained by the Customer.

All other warranties expressed or implied, and remedies with respect to the condition or use of the product, which might otherwise be provided by law in any jurisdiction, are specifically excluded.

This warranty applies to commercial products. The warranty for products supplied under government contracts depends solely on the warranty agreed to as part of that contract.
